BIOCLEAN

Fresh Produce Disinfection Solutions

We have taken a step back and realized that the best way to clean and disinfect any surface is by actually washing it! and that is what BioClean is! a ChlorineFree Antimicrobial Treatment that works. A novel disinfection technology that utilizes the power of ORGANIC Surfactants to remove unwanted harmful and spoilage microorganisms from the surface of fresh produce and does not leave any harmful residues. BioClean not only removed unwanted micro-organisms but also inhibits the readhesion to the produce's surface by creation micelles therefore severely reducing crosscontamination.

A Chlorine-Free Antimicrobial Produce Wash that works!

- Ideal for the sanitization of fresh-cut and whole produce
- Reduces 99.9% of the unwanted microbial load
- Effective against both pathogens and spoilage micro-organisms
- Allowed in Organic and conventional products
- Free of Chlorine, Sulfite, Allergens and GMO
- Colorless, tasteless and odorless
- Made with certified food grade ingredients
- Available as a cost-effective powder and liquid formulations
